Reference for Mr. Rafal Popiel, PTS Consulting

The 6-9.9.2018 Mr. Rafal Popiel was performing in our company a two days training called Problem Solving Methods & Tools.

The content of the training was covering frequently used PBS tools connected also with statistical analysis in Excel and Minitab software. The explanation was done on a professional level with practical examples, reflecting also the actual customer issues in our site.

The evaluation of this training done by participants was very positive, everyone would be able to find a part applicable in his working field (e.t. quality, production, industrial engineering).

Based on this experience I recommend Mr. Popiel as a trainer for this kind of training for those, who want to improve the knowledge of employees concerning Problemsolving and use use of statistics.

With regards

Jičín 13.2.2019
