

From November 2018 to August 2019, Ms. Anna Starzyńska Brzuska commissioned by Huawei Polska sp. z o.o. participated in a project for Cyfrowy Polsat S.A. Capital Group as part of the Wyrocznia 2.0 program designed to implement business processes associated with sales and customer service.

Tasks covered by the project:

- developing training materials for over 10,000 employees;
- preparation of instructional videos for the e-learning platform;
- conducting training (total number of training hours: 250):
 - from Huawei's BES systems implemented as part of the Wyrocznia 2.0 program using the Train The Trainers method;
 - from developing soft skills for future trainers – teaching how to conduct trainings.

Ms. Anna Starzyńska Brzuska fulfilled her tasks very effectively. She is able to work in an international environment under time pressure with full commitment at every stage of the process. Her work was professional in all business conditions both in theoretical and practical form.

She easily established relationships in workshops where she was able to get the attention of participants and motivate them to work together. She has good ability to listen and respond to the current needs of trainees and the group process.

I recommend working with Ms. Anna Starzyńska Brzuska
